***ProteinFind™* Anti- β -Tubulin Mouse Monoclonal Antibody**

Cat. No. HC101

Concentration: 1 mg/ml

Storage: at 2-8°C for one month, at -20°C for one year

Description

The tubulin protein is an essential component of cytoskeleton. It is widely present in mammalian cells and is primarily consisting of α -tubulin and β -tubulin, and has a high level of expression in mammalian cells. It is commonly used as expression control.

ProteinFind™ Anti- β -Tubulin Mouse Monoclonal Antibody is purified mouse monoclonal IgG1 antibody that detects recombinant proteins containing β -tubulin sequence from a variety of species including human, rat, mouse and goat.

Suggested Dilution

- Western Blot: 1:500-10000 dilution.
- ELISA: 1:500-5000 dilution.
- IF: 1:100-500 dilution.

Notes

- Aliquot prior to use, and avoid repeated freezing and thawing.
- Diluted antibody should be used within 12 hours, and avoid storing diluted antibody.
