

ProteinFindTM Anti-β-Actin Mouse Monoclonal Antibody

Cat. No. HC201

Concentration: 1 mg/ml

Storage: at 2-8°C for one month, at -20°C for one year

Description

The actin protein is an essential component of cytoskeleton. It is widely present in mammalian cells, and has a high level of expression in most tissues and cells. It is commonly used as expression control. $ProteinFind^{TM}$ Anti- β -Actin Mouse Monoclonal Antibody is purified mouse monoclonal IgG1 antibody that detects recombinant proteins containing β -actin sequence ((Ac) DDDIAALVC) from a variety of species including human, mouse and rabbit.

Suggested Dilution

• Western Blot: 1:500-10000 dilution.

• ELISA: 1:500-5000 dilution.

• IF: 1:100-500 dilution.

Notes

- Aliquot prior to use, and avoid repeated freezing and thawing.
- Diluted antibody should be used within 12 hours, and avoid storing diluted antibody.
