

ZGB Low Cell Density Genomic DNA Extraction Kit

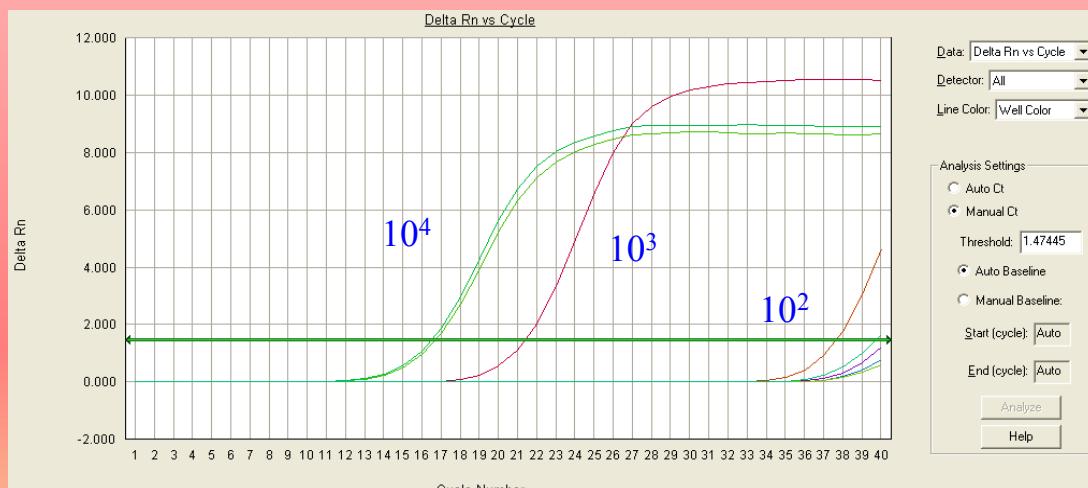

Extract the genomic DNA from 10^2 - 10^3 cell number.

Save a lot of time for cell culture

The Nano particles can high efficient binding low concentrate DNA and extract high quality nucleic acid

Product Features:

1. Simple , Convenient , Rapid: The protocol only take 30 min
2. Reduce the cell culture time: 1-2ug DNA from single cell culture 10^2 - 10^4
3. High quality DNA: The DNA is ready for q-PCR or others assay
4. Low cost: Reduce the cost for cell culture medium and material
5. Fast: Save the time for cell culture.. It is the best tool for cell mutation selection

Extract the DNA from different cell number (10^4 , 10^3 , 10^2) and assay by qPCR

Item name	Cat number	Scale	Pricing
Low Cell Density Genomic DNA extraction kit	GCIR06-50 /200	50/200RXN	USD\$200/700
